

# PREVALENCE OF FEMALE GENITAL MUTILATION IN THE WORLD

Female genital mutilation is a traditional practice that can have serious lifelong consequences for the health of girls and women.

These mutilations are condemned by international human rights conventions.

For more information [www.gams.be](http://www.gams.be)

## Prévalence % (15-49 years old)

Sources based on DHS & MICS (April 2022) and other nationally representative surveys

Benin	9,2	Ethiopia	65,2	Kenya	21	Sierra Leone	83
